Product Specification Sheet:

Compact DCII

Dementia Care Height Adjustable Bath with Powered Seat

Highlights:

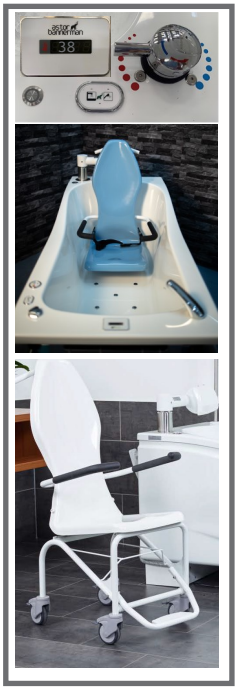
- **Dementia Care** features and lockout
- **Height adjustable** to minimise carer handling strain
- **Integrated powered seat system** for safe trans-fer (detachable option)
- **Seat transfer trolley** for easy bathroom to bed-room transfers (with detachable seat option)
- **Robust GRP** panels and leg covers
- **1600mm and 1700 mm** options

The **Compact DCII Bath** is the first bath specifically designed for use within a dementia care setting. The unique auto lockout ensures that the water cannot be accidentally turned on and that the bath features are immobilised. The bath has a built in auto-fill system to enable the carer to set the bathwater running unattended, without the risk of overfill.

The unique shape of the Compact bath range and height adjustable design give maximum com-fort to the bather and minimal strain and ease of use for the carer. With a proprietary bearing system, multi-layer GRP panels, and high grade 304 stainless steel parts, the Compact range has been built to the highest standard, **designed for longevity**.

The **integrated powered seat,** with its clip and lock lap strap, nursing arms and obstacle sensor, enables bathers to transfer safely and comfortably. On the Compact DCII, there is an option for the seat to be of a contrasting colour to help bathers with perception issues to sit down more assuredly. The seat is shaped to give optimal carer access, especially with the commode seat option. There is also a detachable seat option where the seat can be completely removed, and a **headrest fitted** to enable comfortable bathing when the seat is not in use. A transfer trolley is available for safe and smooth transfers.

The gantry system is WRAS approved and provides backflow protection to fluid category 5 level and TMV3 temperature control. The bath water controls are fitted with a separate TMV3 tem-perature control with a digital display showing the temperature of the water leaving the spout.



Standard Features:

- Maximum Working Load (MWL) 150 kg/24 st
- Powered seat with lap strap, nursing arms and obstacle sensor
- Bath filler system with built in TMV3 temperature regulation and ¼ turn controls
